

MPC-LS Vehicle Network Processing Evaluation Board

MPC-LS-VNP-EVB

Last Updated: Aug 5, 2022

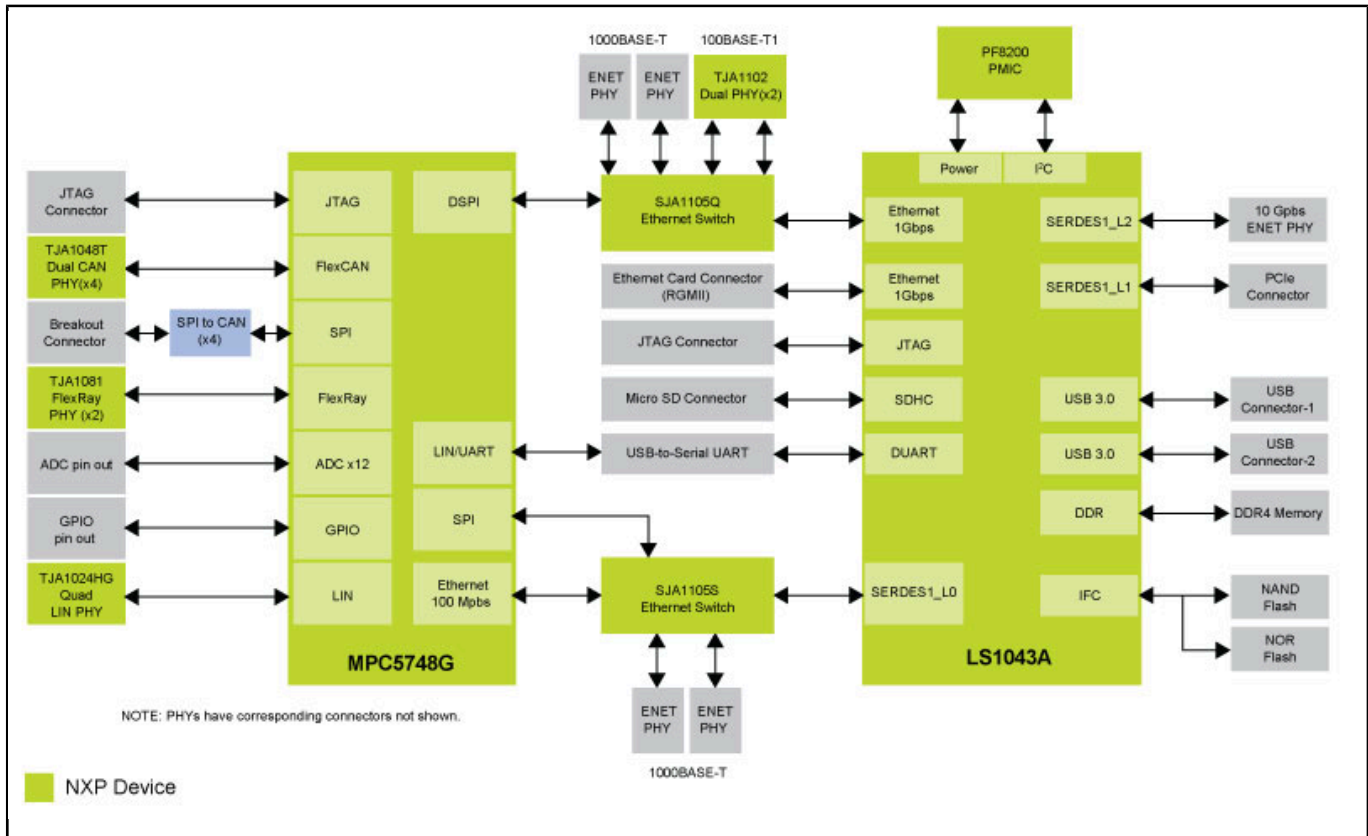

The MPC-LS-VNP-EVB is an evaluation and development board engineered for Vehicle Network Processing applications, ideal to develop advanced gateways for offering new vehicle services, and edge data analytics.

In addition to substantial compute performance, the MPC-LS VNP EVB offers a combination of automotive and enterprise networking technology with a wealth of interfaces (CAN/LIN/FlexRay/Ethernet) for vehicle networks.

Including peripheral devices with PCI Express and USB interfaces that can be leveraged by OEMs, Tier 1s, and software ecosystem partners to shorten time to market.

The MPC-LS VNP Evaluation Board is only available for purchase for approved customers. Each order will be reviewed prior to being fulfilled. We apologize for any experienced inconvenience as a result of this approval process.
